

## **Look in the Downloads folder.**

Your Android Downloads folder is where all your important files will be saved from an email, message, or another outlet.

Here is how to find downloads on your Android:

1. Open your Android app drawer by swiping up from the bottom of the screen.  
This can be accessed by tapping the icon on the home screen.
2. Select My Files (or File Manager). If you don't see the My Files app, select the Samsung icon with multiple smaller icons in it. My Files will be located here.
3. Once you're in the My Files app, select Downloads. Now you can see all of your downloads.
4. You can tap the Browse icon at the bottom of your screen to search for a PDF quickly.
